STANDARD GUIDELINES:
These guidelines are consistent with the Interactive Advertising Bureau specifications (www.iab.net)
• Doubleclick is used to serve all Bonnier Corp Advertisements
• There is a 24-hour turnaround time once all creatives are submitted to Online Advertising Operations
• All ad units must launch a new browser window when clicked on
• All static ads types are accepted (.jpg, .gif, .swf, .html)
• Max initial load file size should not exceed 30k
• Below is a list of the most commonly used third party vendors. For a complete list of approved vendors please contact Bonnier. Bonnier has the ability to serve third party tags that are not on the list of approved vendors but we will not be able to track click-throughs.

Approved Third Party Ad Tags
Atlas Rich Media
Bluestreak EyeReturn
DoubleClick Eyewonder
Interpolls Pointroll
Mediaplex Unicast

THIRD PARTY SPECIFICATIONS
• Third Party tags should be served via JavaScript Ad calls, not iframes
• Audio needs to be user initiated with a clearly recognizable on/off button
• All floating ad units should have a clearly recognizable close button
• Max initial load file size should not exceed 30k
• Additional polite download should not exceed 80k
• Frame rate per second should not exceed 18fps
• Animation length should not exceed 15 seconds

Expanding Ads
Most Common Sizes: 728 x 90
300 x 250
728 x 225
400 x 350; 300 x 600; 600 x 250

MOUSE OVER/MOUSE OFF
• Ad should expand upon mouse over or click on expand button
• Ad should retract upon mouse off or clicking a close button
• If the ad expands with user click, the panel still must retract when mouse is removed
• Any sound should be user initiated by click, not mouse

FLASH AD UNITS
• Flash files served via DoubleClick must be coded properly for proper click and impression tracking
• All Flash files must be submitted as a .SWF file with accompanying back up gif/jpg for display to users who do not accept Flash
• A click through URL must be supplied
• We accept Flash version 6-10

FLASH MX/ALL VERSIONS
A clickable flash object such as a button or hitarea in the flash movie clip will require some actionscript attached to it.
1. Associate the on(release) event with that object.
2. The object will now listen for that particular event. When the event occurs it will trigger actionscript instructions.
3. Place the “getURL(clickTAG):” actionscript as the instructions. The flash ad code generated will be programmed to pass in the ‘clickTAG’ as a parameter to that flash ad upon which clicking on the ad will direct the user to the click through URL value found in the clickTAG.
4. Make sure to check off the “Expression” checkbox for the URL field that is the variable for the getURL actionscript function.

Button Code: on (release) {getURL (_level0.clickTag, "_blank");}
The extra parameter for the getURL function determines the target window for the redirected content. "_blank" will generate a new browser window.
